

PDQ Line
Rolling machines

High **quality**
rolling systems

Regg Rolling is a designer of high precision two and three dies spline and thread rolling machines.

Features & benefits

- A new loading system for a production speed **up to 60 pieces per minute.**
- All mechanical components have been designed with F.E.M. analysis to obtain the most rigid structure for less die wearing.
- Direct Drive and zero backlash gear reducers on the two spindles for perfect die matching and quick set-up.
- Siemens PLC-S7-300 controlled for easy maintenance and automation.
- User-friendly machine maintenance, all components can be easily replaced.
