**Nano****Cube****V-Scan**

## All in one

This instrument replaces several expensive, traditional measuring tools such as calipers and dedicated benches. The i360 is independent from temperature variations. The measuring is reliable and independent of potential manual mistakes of operators.

## Fast and reliable

The i360 viewer has been designed and developed by Regg Inspection in close cooperation with its customers. The i360 is manufactured to be a reliable and precise measuring instrument, while being designed to be easy to use. All measurements are taken all at one in less than a second.

## Features & benefits

- Modular, compact and portable
- All measurements in real time
- Easy saving of programs and measurement data
- Possibility to export all data via USB port or Wireless
- Ready to connect to a printer
- High resolution digital camera system with high quality telecentric optics
- Special workholding for automatic part rotation (optional)
- Special workholding fixture

# i360 Series

High precision **measuring bench** for manufacturing

Regg Inspection designs and manufactures high quality inspection systems with modular design.
